
Score saving problem.

Posted by Admin - 2008/03/12 14:16

We have had several reports of members scores not being saved at the end of a game. The developer is trying to get to the bottom of it but please give us any relevant information here.

What game were you playing?
What day & time did it happen?
Was it a new high score?

Thanks

Admin

Just had this problem. Sat 22/03 @ 19:58. I was playing 12 Swap and had a score of ~65k which was good enough for 4th place.

Shaun.

The arcade has had a small upgrade today to try and fix at least some of the problems with some games not saving after long sessions.

I'm still expecting another patch in the next few days which will hopefully fix any outstanding problems.

Please continue to post any problems you have here.
